Skipping Stone Presents at the 2011 Storage Week Summit

San Diego, CA, July, 2011 – Senior Consultant, Rebecca Schlanert, presented on the topic *Thermal Storage for Peak Load Shifting at Commercial Sites* at the 2nd Annual Infocast Storage Week Summit in San Diego on Monday, July 11. The conference serves as an International Market Development Hub for the Grid-Scale energy storage sector.

“Building cooling/air conditioning systems account for one of the largest on-peak demand sources with approximately 12 GW of on-peak demand in the United States. Currently there are about 3,000 commercial and industrial thermal (ice) energy storage installations in place, and that number is expected to double in the near future as the commercial sector seeks a portfolio of approaches to manage their energy usage,” said Rebecca.

The presentation is posted at www.SkippingStone.com/news.

About Skipping Stone

Skipping Stone is an energy consulting firm providing market assessment, strategy development, strategy implementation, talent management and managed services. We help clients navigate market changes, capitalize on opportunities and manage business risks. Our focus is on the natural gas, power, renewable energy, energy technology, energy management and demand response market sectors. Established in 1996, Skipping Stone’s policy of deploying only energy industry veterans has delivered measurable bottom-line results for over 230 clients.

Skipping Stone serves clients globally through offices in Atlanta, Boston, Los Angeles and Houston.
